

ITINERARY A / NATURALIST

DAY	VISIT
WEDNESDAY	AM: Flight to Baltra Airport Galapagos
THURSDAY	AM: Santiago - Sullivan Bay PM: Rabida - Rabida
FRIDAY	AM: Isabela - Punta Vicente Roca PM: Fernandina - Punta Espinosa
SATURDAY	AM: Isabela - Las Tintoreras PM: Isabela - Wet Lands
SUNDAY	AM: Mosquera PM: North Seymour
MONDAY	AM: Floreana - Post Office Bay PM: Floreana - Punta Cormorant
TUESDAY	AM: South Plazas PM: Santa Fe
WEDNESDAY	AM: Santa Cruz Bachas Beach Flight back to mainland Ecuador

ITINERARY B / NATURALIST

DAY	VISIT
WEDNESDAY	AM: Flight to Baltra Airport Galapagos PM: Santa Cruz - Bachas Beach
THURSDAY	AM: Santiago - Sullivan Bay PM: Rabida
FRIDAY	AM: Isabela - Punta Vicente Roca PM: Fernandina - Punta Espinosa
SATURDAY	AM: Isabela - Las Tintoreras PM: Isabela - Wet Lands
SUNDAY	AM: Mosquera Flight back to mainland Ecuador

ITINERARY C / NATURALIST

DAY	VISIT
SUNDAY	AM: Flight to Baltra Airport Galapagos PM: North Seymour
MONDAY	AM: Floreana - Post Office Bay PM: Floreana - Punta Cormorant
TUESDAY	AM: South Plazas PM: Santa Fe
WEDNESDAY	AM: South Plazas - South Plazas PM: Santa Fe - Santa Fe

M/Y BLUE SPIRIT

8D / 7N - DAY BY DAY PROGRAM

DAY 1: WEDNESDAY - FLIGHT TO BALTRA AIRPORT GALAPAGOS AND SANTA CRUZ HIGHLANDS

SANTA CRUZ ISLAND

It is the center of the Archipelago with a diversity of wildlife and with amazing vegetation. This is the second largest island after Isabella.

DAY 2: THURSDAY - SANTIAGO AND RABIDA ISLANDS

SANTIAGO ISLAND

Santiago or "San Salvador" has an area of 585 square meters and an altitude of 907 meters.

RABIDA ISLAND

Jervis Island or Rabida Island is located at the south of Santiago. It has an area of 4.9 square kilometers and an altitude of 367 meters. Visitors have the single opportunity to see pelicans. Here nine of the fourteen species of finches are found.

DAY 3: FRIDAY - ISABELA AND FERNANDINA ISLANDS

ISABELA ISLAND

Isabela Island was named in this way in honor of Queen Isabela of Spain. Isabela has an area of 4,640 square kilometers and an altitude of 1,707 meters. This island occupies the 60% of the area of Galapagos making it the largest island of the archipelago. The Equator passes directly through Isabela.

Punta Vicente Roca: After breakfast, passengers will explore the island by boat, while a naturalist guide explains the geology of the area. This site is close to bird nesting sites like cormorants and Galapagos penguins. The climate will offer to the passengers the possibility of snorkeling in the cliffs of the area that will show you an abundant marine life, many of the times you can see sea turtles and the "sunfish" (mola mola). This is one of the most impressive and beautiful sites in the Galápagos Islands.

FERNANDINA ISLAND

Fernandina is the third largest island of the Archipelago. This island has an area of 642 square kilometers and an altitude of 1,494 meters and offers the opportunity to see small volcanic eruptions; also this island is the home of Galapagos penguins, sea lions and many other extraordinary species.

Punta Espinosa: is located in the northeast of Fernandina. In this placae you will have the opportunity of seeing hundreds of marine iguanas gathered at the sand.

DAY 5: SUNDAY - MOSQUERA AND NORTH SEYMOUR ISLANDS

Mosquera

Mosquera is located between Baltra and Nourth Seymour Islands. Mosquera is a reef of rocks and corals. It is a flat island product of a geological elevation. It has a length of 160 meters and a width of 600 meters.

North Seymour

North Seymour is covered with bushy vegetation and many endemic species that make it remarkable and it is the home of one of the largest population of blue-footed booby birds and magnificent frigate birds.

DAY 6: MONDAY - FLOREANA ISLAND

FLOREANA

Floreana is one of the oldest islands of the Archipelago as well as one of the smallest. It has an area of 173 km squared and an altitude of 640 meters. It supports an abundant wildlife, with a variety of native and introduced species like: Shorebirds, flamingos, stilts, white-cheeked pintail ducks, migratory birds and nesting sites; sea lions and wide forest of Palo Santo.

South Plazas

South Plazas is a small island with an area of 0,119 km squared and an altitude of 23 meters that was formed by a stream of lava from the bottom of the ocean. Depending of the season, the vegetation changes its color. This island is the home of a large number of species such as: land iguanas, swallow Tailed Gulls, sea birds, brown pelicans, red-billed tropicbirds and frigate birds.

Santa Fe

Santa Fe is a small island with 1,9 kilometers squared and an altitude of 24 meters. Opuntia Cactus is part of its characterized dense forest vegetation; there are also salt bushes along the trail as well giant prickly pear cactus. Talking about fauna, this island is the home of one of the most beautiful coves and endemic species

like Galapagos snake, the Galapagos Hawk, Galapagos mockingbird, sea lion colonies, rice rats and one of the two species of land iguanas of the islands.

DAY 8: WEDNESDAY - WEDNESDAY - BACHAS AND FLIGHT BACK TO MAINLAND

Bachas Beach is a unique landscape with white-coral sand on a magnificent beach where you can also observe many endemic species such as sea turtles, migratory birds, ducks, and flamingos.

Transfer to the airport.

All Galapagos itineraries are subject to change without prior notice due to National Park regulations, weather conditions, and majeure.
